

Xerox® WorkCentre Pro and EFI SendMe: Streamlined, Centralized Archiving

Bewindvoederskantoor van den Berg is a credit management agency that handles up to 900 cases at any given time. The agency manages credit-resolution cases for businesses as well as private individuals, with each situation requiring the agency to process invoices, manage payment schedules and providing regular updates to local courts.

The Challenge:

Bewindvoederskantoor van den Berg — a Netherlands-based credit management agency — required an efficient method for digitizing a huge volume of company documents and archiving them in a centralized location for fast retrieval and distribution.

The Solution:

Xerox and EFI provided a complete solution consisting of a Xerox® WorkCentre Pro® 232 system and one EFI SendMe station. The solution allows the company's important business correspondence and client records to be scanned, emailed, and electronically filed.

The Results:

The company has benefited from the digitization by saving time, improving productivity and document-flow efficiency, and increasing office space.

Working together...getting results.
Together we can.
