

EX Print Server Powered by Fiery® for the Xerox® Color 560/570 Printer

Get the most from your printer with an innovative, scalable, integrated solution.

This market-leading combination gives you professional-looking finished jobs that win new business and get your customers noticed.

Boost your production and profits.

Fiery® technology increases your profits by delivering high-impact documents with vibrant images and color that exceed your customers' expectations. It enables you to produce short-run jobs profitably by automating manual tasks and increases your workflow flexibility by supporting industry-leading variable data printing (VDP) formats.

Work more profitably with new services.

With Fiery technology, you can produce effective marketing pieces with the widest range of output options, including automatic identification of job elements such as text, images and spot colors. This feature also eliminates the need to re-program jobs, making the process simple and quick. The Fiery server is ideal for producing powerful marketing materials, personalized communications and packaging and photo publishing applications.

Get outstanding color every time.

The Fiery server helps you produce precise, exact, high-quality color out of the box. It integrates the essential components of Fiery Graphic Arts Package, Premium Edition, Fiery Spot-On™ and the Fiery Color Profiler Suite to control and manage color throughout your workflow.

Deliver finished jobs simply and quickly.

The new Fiery Setup Wizard allows you to specify your specific printing environment and ensures that your Fiery server is set up correctly. Fiery technology allows you to centralize job management by connecting to all Fiery servers on the network. The intuitive interface of Fiery Command WorkStation® print job management makes complex jobs simple to set up and print, regardless of the operator's experience. The flexible software runs on a PC or Mac® and adapts to any environment.

Automate with seamless integration.

Fiery JDF technology connects EFI solutions and Fiery-enabled solutions, so you can move job information through your system faster and more efficiently.

By supporting the Adobe® PDF Print Engine, Fiery servers also offer a native end-to-end PDF workflow, allowing you to improve the consistency and flexibility of your printed output from design to print.

Using Fiery servers and Fiery Command Workstation enables a new level of integration for process and profit improvement, including seamless connectivity to Xerox® FreeFlow® for workflow automation.
