Xerox Solid Ink Technology Best Eco-Friendly Ink Technology

- Xerox Solid Ink Sticks produce great color and are easy to use, cartridge free and environmentally responsible
- Non-toxic ink is resin-based, similar to a crayon, making it safe to handle by anyone
- Ink is instantly fused onto the paper using heat and pressure, producing great image quality on any kind of media
- Produces 90 percent less ink waste during use than a comparable laser device
- Certified by the National Association of Printing Ink Manufacturers (NAPIM) to have 30% bio-derived renewable material content
- Simple design with short paper path demonstrates solid ink printers are fast and reliable
