Xerox®

Xerox® FreeFlow® Accxes® Copy
Gain big color benefits with your wide format workflows

Double up on your productivity and your profits

Xerox® FreeFlow® Accxes® Copy software maximizes your wide format color scanning workflows. With Accxes Copy, you can produce excellent color copies from color scans of hard copy documents. It fully integrates with Xerox® Wide Format printers and scan systems to produce copies on remote wide format and narrow format color printers.

Accxes Copy enhances your Xerox® Wide Format printers

If you work with a dynamic mix of color and monochrome documents in both digital and hard copy, you will find Accxes Copy extraordinarily beneficial. It's an ideal color solution for wide format users in a variety of environments, including scanning bureaus; print-for-pay businesses; architecture, engineering or construction firms; legal offices or in-house centralized reproduction departments. Accxes Copy delivers flexibility and productivity throughout your printing environment.

Accxes Copy is a Windows-based software solution. It runs on a separate PC from the FreeFlow Accxes Print Server and therefore the user interface is separate from the integrated Xerox® Wide Format printer solution user interface.

Move directly from scan to color output on the printer of your choice

With Accxes Copy, you can produce excellent color output from color scans of hard copy documents. It is fully integrated and processes color scans directly from the Xerox® Wide Format scan systems and all Xerox® Wide Format printer solutions that are driven by the FreeFlow Accxes Print Server.

In addition, you can produce your color copies on most wide format and narrow format color printers, both Xerox® and non-Xerox® devices. Accxes Copy utilizes Microsoft® Windows® based print drivers, providing you access to the industry standard in flexibility and printer support. You can also opt to print on more than one printer if desired. (Please note, while you can print to more than one printer, printing to multiple printers is not simultaneous; you can print to only one printer at a time.)

Designed for demanding wide format applications

- Architectural or construction plans
- Architectural or engineering renderings
- Schematics
- Electrical diagrams (e.g., wiring)
- Mechanical 2D
- Solids modeling
- Mechanical 3D
- Scientific/medical
- Seismic
- GIS/mapping

Big color, big benefits for your business

With Xerox® FreeFlow® Accxes® Copy, you can do more with, and expect more from, your wide format color scanning workflow. Not only can you produce great color prints from scans, but this solution enables you to work with both Xerox® and non-Xerox® devices to get your jobs done.

Key features

- **"Green Button" Interface.** With scan setting templates, even complex workflows are just one click away.

- **Print Preview.** See your scan to verify quality before printing.

- **Scan Once Workflow.** No need to rescan your originals to achieve most editing functions. You can scan to PDF and print remotely using a single scan.

- **Scan to PDF and Print Remotely** using a single scan.

- **Automatic Color Calibration.** Calibrate the scanner to best match every printer in your shop.

- **Intelligent White Point.** Clean up older originals by setting a unique white point on each scan.

- **Areas of Interest.** Quickly identify the key area of the scan that you would like to print.

- **Advanced Color Management.** Extensive advance color controllers achieve optimum output quality.

- **Print from File.** Supports digital file input as well as scanned hard copy.

- **True Adobe PDF and PostScript Support.** Be confident that your documents are accurately viewed and printed.

It's easy to view and manipulate images

An intuitive user interface and built-in viewer make it easy for you to see and manipulate scanned images. Scanned jobs are immediately viewable to you, and you can use Print Preview to correct any scanning errors. This not only improves the quality of your output, it also helps you cut costs by avoiding wasted prints.

You'll have access to tools that enable you to control size, scale, output quality, copy count and sets build for your copies. A major benefit of Accxes Copy is only one scan is required. Once you've made your initial scan, you won't have to rescan a document after choosing different print modes, quality settings, output sizes or templates.

Expect great quality color output

You can rely on Closed Loop Color Calibration and automatic and manual controls, including black point, white point, lightness and sharpness, to ensure high quality color results for your output. With Closed Loop Color Calibration, you can choose from three calibration modes to achieve quality scans and great results when you print to the remote printer you have selected. And your workgroups can achieve excellent color integration for technical document applications without purchasing another color printer. You'll also find that Accxes Copy maximizes the quality of your Xerox® TotalAccxes workflow.

Templates save time, boost your productivity

It's easy to store your frequently used settings with Accxes Copy templates. Even complex workflows are often repetitive. With Accxes Copy, you can configure and save all of your repetitive workflows in Accxes Copy Templates. Your most complex workflows are reduced to selecting your template and pushing the "Green Button," eliminating frequent image manipulation tasks and increasing your productivity and quality. And because these templates simplify your work processes in multi-user environments, your users don't have to be trained scanning experts.

The total support you need

We support your entire solution, from printer to media and consumables. Our worldwide network of award-winning service professionals is always ready to help you make the most of your Xerox® solution and help you grow your business.

Expect more from your wide format workflow

Xerox® FreeFlow® Accxes® Copy Specifications

We recommend a dedicated host PC for Xerox® Accxes Copy, but it is not mandatory. If you are using a non-dedicated device, the PC must be compatible with all of the host computer's applications.

When you use Accxes Copy with non-Xerox® printers, printer specific Microsoft® Windows® print drivers must be installed on the host PC.
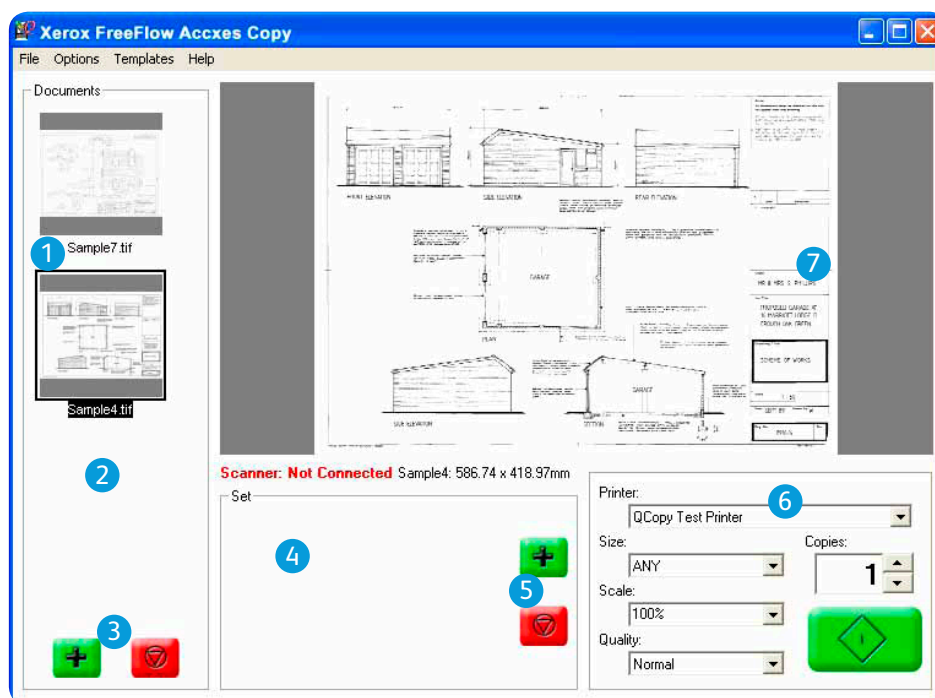

Host PC Minimum Specifications

- Pentium 4, 2 GHz or better (Preferably Core 2 Duo)
- Microsoft® Windows® XP (32 bit), Vista® (32 bit) or Windows 7 (32 and 64 bit), latest service packs recommended
- Windows Server® 2008, Windows Server R2
- 200MB of available disk space for installation
- 10GB of available disk space for operation
- Minimum 2GB of RAM – 3GB RAM recommended
- CD-ROM Drive for installation
- 1024 by 768 or greater resolution display
- Configured network interface

Scanners Supported

- Wide Format Scan System (Synergix) with Xerox® FreeFlow® Accxes® Print Server
- Xerox® Wide Format 6622 Solution™ scanner
- Xerox® Wide Format 6604/6605 Solution™ scanner
- Xerox® 6204® Wide Format scanner with FreeFlow Acces Print Server
- Xerox® 6279® Wide Format Printer scanner with FreeFlow Accxes Print Server

Xerox® FreeFlow® Accxes® Copy Main Screen

1. Currently selected image
2. Preview Pane – displays currently scanned documents
3. These buttons add or remove documents (removing also deletes them from the scan system)
4. This is visible only when used to build sets
5. These buttons add or remove documents from a set
6. Selected Printer and Copy controls
7. Main view of the currently selected image
